Nuclear Medicine Communications **7**, 923–931 (1986)

INDEXES TO VOLUME 7

Subject index

The abbreviation (R) after a page number indicates a review article, (E) indicates an editorial

Brain

Brain SPECT imaging with $^{99}Tc^{m}$-hexamethylpropyleneamine oxime in the early detection of cerebral infarction: comparison with transmission computed tomography, 873

Cerebral circulation during endotixic shock with special emphasis on the regional cerebral blood flow *in vivo*, 531

Does the human brain age asymmetrically? - a hypothesis, 793 (E)

The *in vivo* distribution of $^{99}Tc^{m}$-HM-PAO in normal man, 647

Uptake of ^{77}Br-spiperone in the striata of schizophrenic patients and controls, 599

Cardiac

The accuracy of functional parameters extracted from ventricular time–activity curves by Fourier curve fitting: a simulation study, 91

Comparison of phase analysis with factor analysis in equilibrium gated radionuclide angiography, 857

A comprehensive clinical validation of the nuclear stethoscope, 717

Dependence of ejection fraction results on choice of algorithms for a cardiac phantom, 33

Detection and localization of ventricular preexcitation in Wolff–Parkinson–White syndrome (comparative study with body surface mapping), 497

The effects of chronic hypoxia on left ventricular peak filling rate evaluated by equilibrium radionuclide angiocardiography, 705

Effectiveness of oblique section display in thallium-201 myocardial tomography, 609

Functional mapping of ventricular contraction and phase using single-photon emission computer tomography (SPECT), 825

Improved accuracy of ejection fraction measurements using a commercial cardiac phantom, 65

In vivo stability of *in vitro* labelled $^{99}Tc^{m}$-red blood cells for radionuclide determination of left ventricular ejection fractions and volumes, 541

Incidence, severity, and clinical course of right ventricular involvement after acute inferior myocardial infarction; assessment by sequential $^{99}Tc^{m}$-pyrophosphate scan and gated blood pool scan, 887

Left ventricular ejection fraction determined with the nuclear stethoscope, gamma camera and contrast ventriculography, 337

A method of radionuclide angiography and comparison with contrast aortography in the assessment of aorto-iliac disease, 45

Myocardial fatty acid metabolism after acute ethanol consumption, 671

The objective evaluation of the phase image: a comparison of different automated methods, 697

15-(*ortho*-^{123}I-phenyl)-pentadecanoic acid, a new myocardial imaging agent for clinical use, 683

Quantitative analysis of stress thallium-201 studies: comparison of SPET and planer imaging in the detection of CAD, 427
Radionuclide cardiac ejection fractions: a useful disparity between LAO and LPO views, 197
Relationship between ^{201}Ti uptake and oxidative metabolism in cultured myocardial cells, 59
The reliability of first harmonic Fourier phase analysis fitting to simulated time–activity curves, 157
Scintigraphic phase analysis of left anterior hemiblock, 191

Endocrine

Enterohepatic circulation and distribution of ^{131}I-6 β-iodomethyl-19-norcholesterol (NP-59), 625
Imaging of metastatic medullary carcinoma of the thyroid with ^{131}I-*meta*-iodobenzyl guanidine, 215
The influence of hypercholesterolaemia on the adrenal uptake and metabolic handling of ^{131}I-6β-iodomethyl-19-norcholesterol (NP-59), 631
A simple objective method of recognizing goitre during parathyroid scintigraphy, 489

Gastrointestinal

Diabetic oesophagoparesis: assessment by solid phase radionuclide scintigraphy, 165
Enterohepatic circulation and distribution of ^{131}I-6β-iodomethyl-19-norcholesterol (NP-59), 625
Measurement of gallbladder volume and dynamics by combined SPECT and planar scintigraphy, 437
Oesophageal transit patterns in healthy subjects, 741
Protein meal and gastrin levels: a radioisotopic study *in vitro*, 129
Regional distribution of emptying index (RDEI)–a new method for visualizing the stomach evacuatory function. A preliminary report, 233
Renal scintigraphy and survival of indium-111 labelled platelets in patients with diabetic nephropathy, 349
Representation of the path of a non-disintegrating capsule in the gastrointestinal tract using external scintigraphy and computer graphics, 587
Scintigraphy in duodeno-gastric reflux: a new method of quantification, 747
Short-term and long-term monitoring of the serum level of TPA after radical resection of gastrointestinal or lung cancer, 121
^{99}Tc^{m}-DPTA uptake in malignant and inflammatory bowel disease: experience from gastrointestinal bleeding studies, 381
Thallium scintigraphy in the evaluation of portal systemic shunting. The problem of rectal absorption, 25
Use of TPA in hepatology of infectious nature. Initial observations, 137

Haematology and infection

Differential centrifugation of leucocytes and platelets applied to ^{111}In-leucocyte labelling, 105
Evaluation of three methods of platelet labelling, 519
Imaging of inflammatory and infectious lesions after injection of radioiodinated monoclonal anti-granulocytes antibodies, 659
Indium-111 labelled neutrophil scintigraphic findings in a case of lymphoma, 463
The preparation and *in vivo* behaviour of ^{111}In-oxine labelled neutrophils separated from whole blood using mono-poly resolving medium, 447

Renal scintigraphy and survival of indium-111 labelled platelets in patients with diabetic nephropathy, 349
$^{99}Tc^{m}$-MDP, ^{67}Ga-citrate and ^{111}In-leucocytes for detecting prosthetic hip infection, 113
Technetium-99m labelled porphyrin as an imaging agent for occult infections and inflammation, 17

Kidney

Anomalous DMSA uptake in unilateral renal artery occlusion, 819
A comprehensive analysis of renal DTPA studies. III. Renal artery stenosis, 879
GFR measurement by simulating constant infusion with data acquired using a CdTe detector. A feasibility study, 811
Renal scintigraphy and survival of indium-111-labelled platelets in patients with diabetic nephropathy, 349
Scintigraphic patterns of acute vascular occlusion following renal transplantation, 223
Searching for the idea! kidney agent, 145 (E)
$^{99}Tc^{m}$-(tin) colloid scans in the evaluation of renal transplant rejection, 897

Liver and spleen

Enterohepatic circulation and distribution of ^{131}I-6β-iodomethyl-19-norcholesterol (NP-59), 625
Liver scintigraphy as a screening test in the detection of alcoholic cirrhosis, 71
Measurement of gallbladder volume and dynamics by combined SPECT and planar scintigraphy, 437
Thallium scintigraphy in the evaluation of portal systemic shunting. The problem of rectal absorption, 25
Use of TPA in hepatology of infectious nature. Initial observations, 137

Oncology

The biodistribution of ^{67}Ga-labelled N-hydroxyamino acid derivatives in tumour-bearing rats, 53
The doughnut sign in patients with multiple myeloma, 239
^{131}I and ^{111}In-labelled monoclonal antibody imaging of primary lung carcinoma, 729
Imaging of metastatic medullary carcinoma of the thyroid with ^{131}I-*meta*-iodobenzyl guanidine, 215
An improved Iodogen method of labelling antibodies with ^{123}I, 355
Indium-111 labelled neutrophil scintigraphic findings in a case of lymphoma, 463
Metal decomposition rates of ^{111}In-DPTA and EDTA conjugates of monoclonal antibodies *in vivo*, 831
Monoclonal antibody hapten radiopharmaceutical delivery, 569
Pre-operative axillary lymphoscintigraphy in breast cancer: experience with sub-areolar injection of $^{99}Tc^{m}$-nanocolloidal albumin, 5
Radio-iodine-labelled 5-iodo-2-thiouracil: a potential radiopharmaceutical for establishing the viability of ocular melanoma after radiation therapy, 797
Short-term and long-term monitoring of the serum level of TPA after radical resection of gastrointestinal or lung cancer, 121
Technetium-99m-glucoheptonate lung imaging; has it a role in the diagnosis of bronchial carcinoma?, 907

Radiopharmacy

Animal studies in the *in vivo* stability of ^{211}At-labelled albumin particles, 211
Biodistribution of rats of $^{99}Tc^{m}$-labelled human serum albumin, 617
The biodistribution of ^{67}Ga-labelled N-hydroxyamino acid derivatives in tumour-bearing rats, 53
Cell labelling with indium-111 ten years on, 715 (E)
Differential centrifugation of leucocytes and platelets applied to ^{111}In-leucocyte labelling, 105
Enterohepatic circulation and distribution of ^{131}I-6β-iodomethyl-19-norcholesterol (NP-59), 625
An evaluation of methods for sizing radiocolloidal particles, 511
Evaluation of three methods of platelet labelling, 519
Formation of labelled colloid in $^{99}Tc^{m}$-DMSA due to the presence of bacterial fluid, 505
Formation of large particles in a $^{99}Tc^{m}$-tin colloid preparation, 845
Guidelines for breast feeding following maternal radiopharmaceutical administration, 399 (E)
An improved Iodogen method of labelling antibodies with ^{123}I, 355
Indium-111 labelled neutrophil scintigraphic findings in a case of lymphoma, 463
The *in vivo* distribution of $^{99}Tc^{m}$-HM-PAO in normal man, 647
In vivo stability of *in vitro* labelled $^{99}Tc^{m}$-red blood cells for radionuclide determination of left ventricular ejection fractions and volumes, 541
Metal decomposition rates of ^{111}In-DPTA and EDTA conjugates of monoclonal antibodies *in vivo*, 831
Monoclonal antibody hapten radiopharmaceutical delivery, 569
Myocardial fatty acid metabolism after acute ethanol consumption, 671
15-(*ortho*-^{123}I-phenyl)-pentadecanoic acid, a new myocardial imaging agent for clinical use, 683
The preparation and *in vivo* behaviour of ^{111}In-oxine labelled neutrophils separated from whole blood using mono-poly resolving medium, 447
Pulmonary epithelial permeability: vascular background effects on whole lung and regional half-time values, 183
Radiolytic breakdown of sodium iodine (^{131}I) in sodium iodine (^{131}I) capsules, 839
Radio-iodine-labelled 5-iodo-2-thiouracil: a potential radiopharmaceutical for establishing the viability of ocular melanoma after radiation therapy, 797
Relationship between ^{201}Tl uptake and oxidative metabolism in cultured myocardial cells, 59
Representation of the path of a non-disintegrating capsule in the gastrointestinal tract using external scintigraphy and computer graphics, 587
The stability of $^{99}Tc^{m}$-DPTA in an aerosol delivery system, 755
The sterility testing of dispensed radiopharmaceuticals, 327
Technegas - a new ventilation agent for lung scanning, 865
Technetium-99m labelled porphyrin as an imaging agent for occult infections and inflammation, 17
$^{99}Tc^{m}$-MDP, ^{67}Ga-citrate and ^{111}In-leucocytes for detecting prosthetic hip infection, 113
Use of TPA in hepatology of infectious nature. Initial observations, 137
Which diphosphonate for routine bone scintigraphy (MD P, HD P or DPD)?, 415

Respiratory

The effects of chronic hypoxia on left ventricular peak filling rate evaluated by equilibrium radionuclide angiocardiography, 705

Functional images of lung $^{99}Tc^{m}$-DTPA aerosol transfer in smokers and nonsmokers,581
^{131}I and ^{111}In-labelled monoclonal antibody imaging of primary lung carcinoma, 729
Pulmonary epithelial permeability: vascular background effects on whole lung and regional half-time values, 183
Radionuclide study of bronchial aspiration in intensive care of newborn children, 593
Scintigraphy and angiography in pulmonary embolism, 83
Short-term and long-term monitoring of the serum level of TPA after radical resection or gastronintestinal or lung cancer, 121
The stability of $^{99}Tc^{m}$-DTPA in an aerosol delivery system, 755
Technegas–a new ventilation agent for lung scanning, 865
Technetium-99m-glucoheptonate lung imaging; has it a role in the diagnosis of bronchial carcinoma?, 907

Skeletal

Bone mineral content of the spine with dual photon absorptiometry: normalization of the values, 761
The doughnut sign in patients with multiple myeloma, 239
$^{99}Tc^{m}$-MDP, ^{67}Ga-citrate and ^{111}In-leucocytes for detecting prosthetic hip infection, 113
Which diphosphonate for routine bone scintigraphy (MDP, HDP or DPD)?, 415

Tomography, instrumentation and computing

The accuracy of functional parameters extracted from ventricular time–activity curves by Fourier curve fitting: a simulation study, 91
Bone mineral content of the spine with dual photon absorptiometry: normalization of the values, 761
Brain SPECT imaging with $^{99}Tc^{m}$-hexamethylpropyleneamine oxime in the early detection of cerebral infarction: comparison with transmission computer tomography, 873
Comparison of phase analysis with factor analysis in equilibrium gated radionuclide angiography, 857
Compartment modelling in nuclear medicine: a new program for the determination of transfer coefficients, 405
A comprehensive clinical validation of the nuclear stethoscope, 717
Dependence of ejection fraction results on choice of algorithms for a cardiac phantom, 33
Effects of centre-of-rotation shift on contrast and spatial resolution of the SPECT system, 373
Effectiveness of oblique section display in thallium-201 myocardial tomography, 609
Evaluation of the response of a round hole scintillation camera collimator by the Fourier analysis method, 779
Functional mapping of ventricular contraction and phase using single-photon emission computer tomography (SPECT), 825
GFR measurement by simulating constant infusion with data acquired using a CdTe detector. A feasibility study, 811
Improved accuracy of ejection fraction measurements using a commercial cardiac phantom, 65
Interative display of three-dimensional radionuclide distributions, 475
Measurement of gallbladder volume and dynamics by combined SPECT and planar scintigraphy, 437
A method of radionuclide angiography and comparison with contrast aortography in the assessment of aorto-iliac disease, 45
The objective evaluation of the phase image: a comparison of different automated methods, 697

Quantitative analysis of stress thallium-201 studies: comparison of SPET and planar imaging in the detection of CAD, 427
Quantitative SPECT imaging: influence of object size, 363
The reliability of first harmonic Fourier phase analysis fitting to simulated time–activity curves, 157
Representation of the path of a non-disintegrating capsule in the gastrointestinal tract using external scintigraphy and computer graphics, 587
Volumetric measurements in endotoxic shock using single photon emission tomography (SPECT), 771

Vascular

Criteria for detection of deep venous thrombosis by $^{99}Tc^{m}$-plasmin test, 455
A method of radionuclide angiography and comparison with contrast aortography in the assessment of aorto-iliac disease, 45
Pre-operative axillary lymphoscintigraphy in breast cancer: experience with sub-areolar injection of $^{99}Tc^{m}$-nanocolloidal albumin, 5
The role of the radioisotope phallogram in the investigation of vascular impotence, 173
Scintigraphic patterns of acute vascular occlusion following renal transplantation, 223
Volumetric measurements in endotoxic shock using single photon emission tomography (SPECT), 771

Miscellaneous

British Nuclear Medicine Society 14th Annual Meeting, 209 (E)
Cost-benefit analysis in radiation protection, 855 (E)
European Association of Nuclear Medicine, 645 (E)
Hospital income from private patients, 403 (E)
Implications of the Ionizing Radiations Regulations for typical nuclear medicine departments, 149
Regulations affecting the practice of nuclear medicine, 1 (E)
The role of the radioisotope phallogram in the investigation of vasculogenic impotence, 173
Task Groups in the European Nuclear Medicine Societies, 81 (E)
US contributions to *Nuclear Medicine Communications*, 475 (E)
Validation and diagnosis, 325 (E)
What is the radiation risk, doctor?, 567 (E)
